

**NOTE**

This Sundial is not corrected for longitude.  
For stability, print directly or glue in cardboard .

**INSTRUCTIONS**

- Cut out the sundial by the cutting marks.
- Cut out by the black lines and fold by the dotted lines.
- Select and cut out by the line that corresponds to your latitude (example, Paris is about 48,8° N).
- Fold in half and lift the 2 triangles in each side, until they make a 90° angle with the dial.
- Place the clock with the front facing North. In the Winter, you will have to tell time in the back.
- Add 1 hour in the Summer for daylight savings.
